Corrosives Cabinets

Corrosives Cabinets have a plastic tray on each shelf to collect any accidental spillages. Designed to withstand fire, these cabinets provide a safe environment to store most corrosive chemicals such as acids, alkalis, caustics, sodium, hydroxide solution.

Compliant with AS3780.

- Stainless steel piano hinge for added protection
- Internal door opening latch (as required by the standards)
- Each shelf is supplied with plastic spill trays to contain small spills and leakage
- Additional powder-coating of the shelving and closing assembly for added protection

CODE	DESCRIPTION	SIZE (mm)
