

# Steel Barrier - 910 Double Rail

## Tru-Gard Barrier - 910 Double

Tru-Gard 910mm high double rail is a certified safety barrier system used for traffic management and protecting against forklift injury to personnel and damage to buildings and assets. Double rail offers more protection and a higher strength rating. Bottom rail can be placed 100mm off ground, or at ground level, for protection against fork tines.

- Modular system can be configured to your required site layout
- Post centres of 1.1m ensure that every impact is absorbed by a post
- The 910mm high double rail stops 7T at 6.3km/h
- Compliant with AS/NZS 11701-1 Section 3.8
