

# Pause Gates

Tru-Gard Pause Gates bring pedestrians to a stop before moving into traffic areas.

## Tru-Gard Pause Gate

Tru-Gard Pause Gates provide pedestrians with safe entrance/exit points from walkways. Gates open in a single direction, preventing people from walking directly into live traffic by bringing them to a pause to open the gate toward them.

Safety Yellow powder-coat finish make these gates highly visible, and spring-loaded hinges ensure that they rest in a closed position.

CODE	DESCRIPTION	SIZE (mm)
49-TRG1100Y	Tru-Gard Pause Gate -Yellow powder-coat (internal dry use)	1010(W)
49-TRG1100GY	Tru-Gard Pause Gate -Galvanised with Yellow powder-coat (external use)	1010(W)
49-TR010	Tru-Gard Gate Post	1000(H)

All fixings are included.

Tru-Gard Telescopic Pause Gates offer flexibility for wider/narrower entrance points.

## Tru-Gard Telescopic Pause Gate

Tru-Gard Telescopic Pause Gates provide the functionality of a standard Tru-Gard Pause Gate, but with the added convenience of having length adjustable from 800mm to 1400mm wide. It is an ideal solution for areas where pedestrians, wider trolleys, etc. require access to the walkway.

CODE	DESCRIPTION	SIZE (mm)
49-TRG800Y-TS	Tru-Gard Telescopic Pause Gate - Yellow powder-coat (internal dry use)	800-1400(W)
49-TRG800GY-TS	Tru-Gard Telescopic Pause Gate - Galvanised with Yellow powder-coat (external use)	800-1400(W)
49-TR010	Tru-Gard Gate Post	1000(H)

All fixings are included.
