

Suggested Uses.

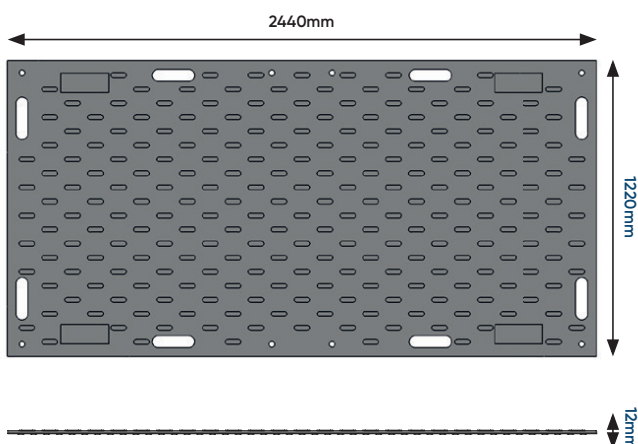

- Create temporary roadways for vehicles, trucks and equipment
- Create large work pads for drilling, temporary flooring and other industrial applications.

Benefits.

- Protects the surface it is placed on while providing traction and reducing hazards from wet and muddy surfaces with its easy clean treads
- Manufactured in UK from tough recyclable HDPE, UV treatment protects against fading and material breakdown.
- Come with moulded in hand holds and are quick and easy to setup, move and reconfigure for changing site needs.

Useful Tip.

You can either use the connectors to join mats, or spike them into the ground to fix them in place. They can also be laid loose without any fixings.

Specifications.

Code	49-GPM
Description	Ground Protection Mat
Material	Recyclable HDPE
Height	12mm
Width	1220mm
Length	2440mm
Weight	33kg
Fixings	8 per mat

Fixings.

49-GPMC	Ground Protection Mat Connectors
49-FR12	12mm x 300mm Rebar Spike
