

Suggested Uses.

- Deter skateboarding on long edge street furniture

Benefits.

- Eliminates potential damage caused to property and architecture by skateboards, bicycles and skates.
- Manufactured from polished marine grade 316 stainless steel to suit square edge and rolled edge landscape walls and other ledges.
- Designed to be cast into new walls during construction or retrofitted with adhesive or grout into a saw cut

Useful Tip.

Suggested spacing is 500–600mm between each Skate Deterrent

Specifications.

Code	12-SDBL
Description	Blade Skate Deterrent
Material	316 Stainless Steel
Width	4mm
Length	100mm
Height	60mm
Pack Qty	10 units

Fixings.

49-ATHP	AT-HP Blue Anchoring Adhesive with Colour Change Technology - 300ml Tube
---------	--

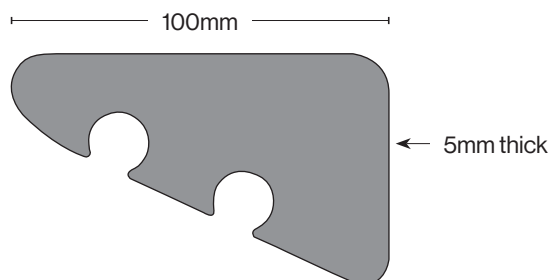

Installation.

Concrete Surface & Timber Surface:

Mask installation zone then mark the length and depth of sawcut. Cut 6mm slot with an appropriate blade and dry fit blade insert to check fitment. Apply all-weather adhesive, fit blade, and remove tape. Fill remaining slot with grout then clean excess mortar/grout from area.

Concrete Surface & Timber Surface:

Install blade insert into mortar/grout joints. Move blade around to get mortar into hollows. Clean excess mortar/grout from area
