

Designed for exceptional protection.

Certified and tested to exceed AS/NZS 1170.1 Section 3.8, Tru-Gard™ Barrier also provides quality and environmental features to complete the package.

① **Small Footprint**
Tru-Gard™ 200mm footprint saves you space.

② **Overlapped Rails**
Tru-Gard™ Barrier overlaps by 200mm and is joined with three bolts to provide maximum strength. Under impact the load is instantly spread.

③ **Front-mounted Rails**
Tru-Gard™ Barrier is fastened to the front face of the posts as opposed to between the posts, which creates a stronger structure.

④ **Coated Edges**
Tru-Gard™ is made from uncoated steel, then fully coated to ensure no edges will potentially rust.

⑤ **Cavity Free Edges**
Tru-Gard™ Barrier has no cavities to hold moisture, germs or pathogens that could compromise the structure and hygiene.

⑥ **Narrow Spacing**
Posts mounted 1.1m apart to prevent pallets from penetrating into the protected zones.

tru-gard™
10 YEAR WARRANTY

10 Year Warranty

Market leading quality giving you peace of mind that your purchase will stand the test of time.

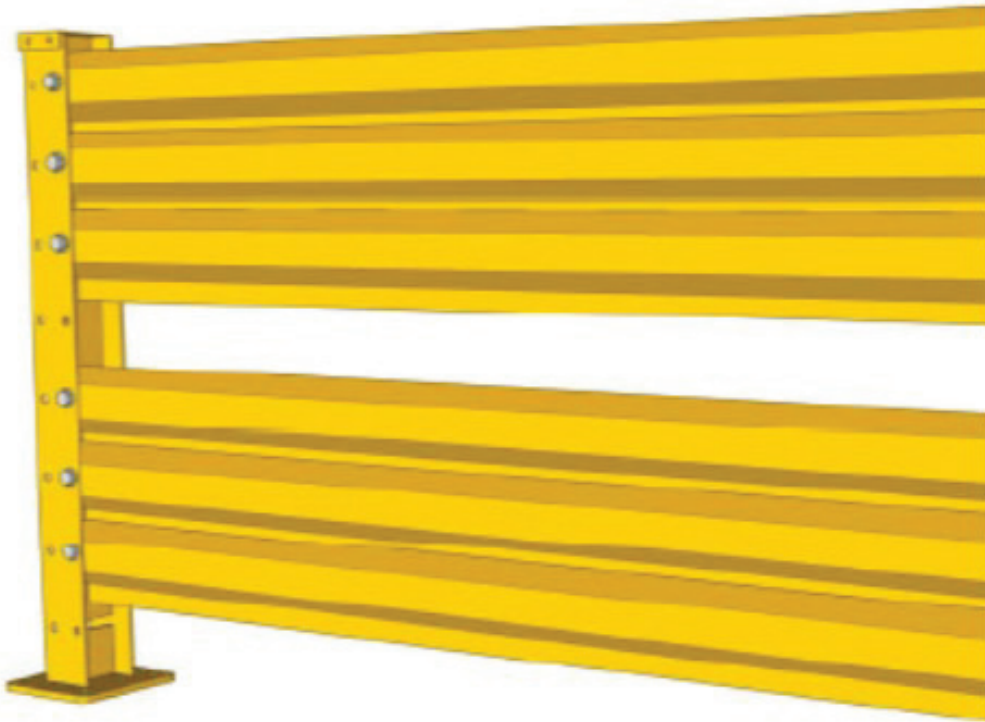

100% Recyclable

Tru-Gard™ can easily be recycled at the end of its life, reducing its carbon foot print and looking after the earth.

Certified & Tested Barrier System

Vanguard Barrier vs. Competitors.

Competitor barriers: Support posts at 2.2m or more with rail bolting between.

Competitor barriers rely on rail through bolt strength.
