Airport Workzone Barrier.

VANGUARD™
Standing between you and harm

Suggested Uses.

- Establish and seperate large airside construction zones. Once water filled, these barricades have excellent staying power during high-wind conditions.
- Can also be utilized in low-speed construction zones, parking lots, and specialty applications where highway construction zone standards do not apply.

Specifications.

Description	Airport Workzone Barrier
Material	Blow molded UV-resistant High Density Polyethylene (HDPE)
Height	609mm
Width	355mm
Length	2440mm
Weight	12.7kg (when empty), 122kg (when full)

Benefits.

- 8-Year UV damage protection.
- Low profile ensures no interference with aircraft.
- Forklift points allow for easy relocation when filled with water.
- Optional accessories include one flashing or steady burn solar hazard light or one bi-directional roadway hazard light.
- Meets FAA A/C 150/5370-2G “Operational Safety on Aiports During Construction”
- Comes in both safety orange and white.
