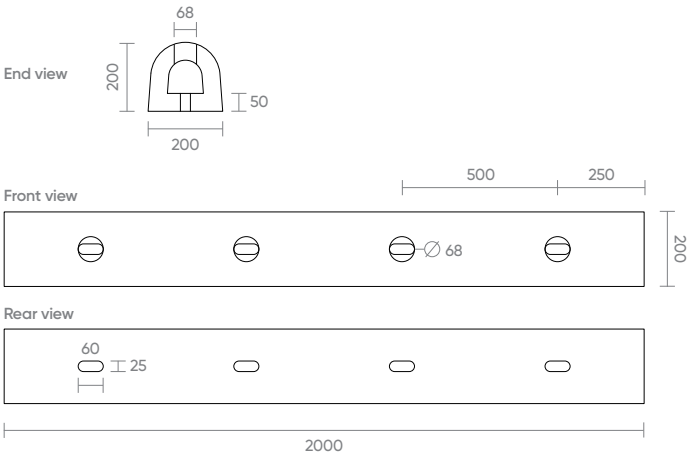
Overview.

Designed for demanding environments, D Type Moulded Rubber Dock Fenders offer a tough, non-flexible solution to minimise impact damage.

Constructed from hard rubber, they provide reliable protection for buildings, vehicles, and infrastructure. Ideal for loading docks with frequent truck and forklift movement, they're also highly effective in ports and wharf areas, delivering long-lasting, economical asset protection.

Fixings.

To ensure the best result, we recommend selecting fixings suited to your specific substrate. If you're fixing to concrete, we recommend M16 x 150mm concrete screws with M20 x 50 x 50 x 3mm square galvanised washers. **Fixings are not included.**


Heavy **2000 x 200 x 200mm (LWD)**
